THERAPY

Visage incorporates double frequency **Radiofrequency** to provide greater firmness, elasticity, volume, product penetration and hydration, sequential **Vacuum** causing an increase in blood flow and opening the lymphatic channels and **LLLT** - PHOTO-BIODYNAMIC THERAPY with high power diodes.

All of them can work in synergy or combined, increasing the effectiveness of each treatment.

LLLT PHOTOBIOOTHERAPY

Low Level Laser Therapy (LLLT) is a new system for treating different problems through light by localized light diodes, with certain wavelengths (colors) and certain working frequencies (Nogier).

With this technique we adjust the organism based on its specific need, by the area and the problem of each patient.

TREATMENTS

A woman in a white bikini is shown from the waist down, holding a white sheet that partially covers her body. The background is a solid purple color. The woman's skin is a light, natural tone, and her hair is not visible. The overall aesthetic is clean and modern, emphasizing the texture of the fabric and the contrast between the white and purple.
