

UNIK
MORFOLOGIC

DERMAJET

DISCOVER OUR BIG NEW

THE NEW GENERATION OF TREATMENTS OF BEAUTY TO TREAT BODY AND FACE

UNIK is the exclusive multiplatform that works synergistically with different technologies focused on integral body remodeling and facial treatments, allowing the treatment of different skin conditions.

It is a device that is integrated into the range of successful Dermajet® devices with a long history at the service of body remodeling. Now adding his technique in facials.

Unik models the figure, reduces the body contour and reaffirms the tissues, thanks to its technologies that work simultaneously, increasing its effectiveness.

BODY TECHNOLOGIES

TRIFREQUENCY
RADIO FREQUENCY

VACUUM
SEQUENTIAL

MESOTHERAPY

ULTRASOUND

MORFOLOGIC
SYSTEM

THERAPY
PHOTODYNAMICS

With **TRIFREQUENCY RADIOFREQUENCY** we work at 1 MHz - 740 kHz - 420 kHz cell stimulation at 3 different depths that allows the fibroblast to produce collagen (firmness), elastin (elasticity), hyaluronic acid (volume and hydration) as well as the elimination of localized fat. With the **SEQUENTIAL VACUUM** we work on a detachment massage that breaks cellulosic sclerosis by traction, increasing blood flow and opening the lymphatic channels with different wavelengths that will allow us to carry out a multitude of treatments. We work with **ULTRASOUNDS** at 1 MHz that provide us with lipid capacity and sonophoresis. And we also work with **LLLT – PHOTOBODYNAMIC THERAPY** with high power diodes.

Its multiple treatments are designed under our **Morfologic System**, thus managing to personalize the treatments.

FACIAL TECHNOLOGIES

Unik incorporates an exclusive triple modality handpiece for facial treatments and small areas.

BIPOLAR RADIOFRE-
QUENCY
BIFREQUENTIAL
2MHz-1MHz

PHOTOBODYNAMICS

TREATMENTS

- ✓ Reducer
- ✓ Celulitis I, II, III & IV
- ✓ Firming
- ✓ Blood Drainage
- ✓ Lymphatic Drainage
- ✓ Radio frequency
- ✓ Sports
- ✓ Acne and rosacea
- ✓ Antiage
- ✓ Brightness
- ✓ Hyperpigmentation
- ✓ Scars

LLLT PHOTOBIOOTHERAPY

Low Level Laser Therapy (LLLT) is a new system for treating different problems through light by localized light diodes, with certain wavelengths (colors) and certain working frequencies (Nogier).

I.O. 630 y 660 +- 10nm

- Cell regeneration
- Anti-inflammatory
- Elastin stimulation
- Stimulation of fibroblast and collagen production

I.O. 520 +-10nm

- Inhibits excess melanin
- Anti-inflammatory
- Elastin stimulation
- Collagen stimulation

I.O. 590 +-10nm

- Rosacea
- Dermatitis
- Anti-inflammatory
- Lymphotropic
- Increases blood circulation
- Draining

I.O. 412 +-10 nm

- Bacteriological
- Acts at the epidermal level
- Inhibits the growth of the horny layer

I.O. 810 +- 10 nm

- Relieve inflammation
- Treat insomnia
- Relieve pain, reduce stress and anxiety
- Activates circulation

COSMETICS

SPRAYS

Ultrasonic thermal and mechanical conductivity. They activate the elimination of fats, stimulate micro-circulation and regenerate damaged tissues.

E-HEBE

Professional cosmetics for rejuvenating and regenerating treatments. Formulated to stimulate the fibroblast by increasing the levels of collagen, elastin and hyaluronic acid.

NIX

Photodynamic booster
Nix Wrinkles: Promotes neo-collagenesis and significantly improves the damage caused by photoaging.
Nix Acne: for type I and II acne.
Nix Redness: Stimulates oxygenation and cellular respiration.
Nix Dark Spots: spots on the face and neck.
