

Dermajet Morfologic

THE LATEST INNOVATION TO COMBAT LOCALISED FAT

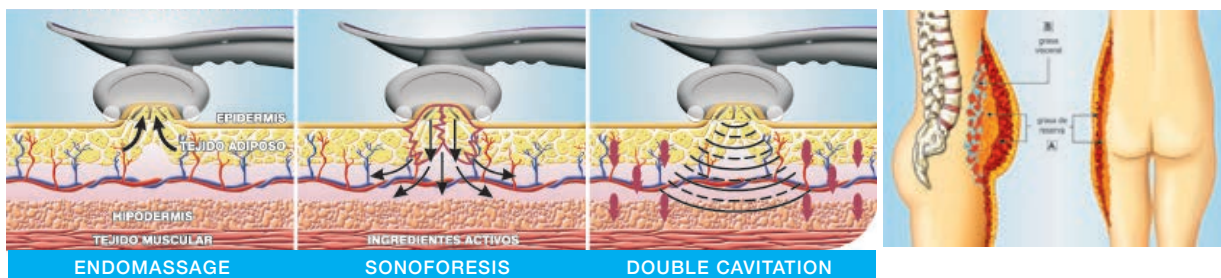

The new **Dermajet Morfologic®** is a multifunctional equipment for body treatments. You can choose different working protocols customising it by treatment, gender, patient morphology and area to be treated.

Dermajet Morfologic® accomplishes a treatment completely adapted to each individual that shows effective and visible results from the very first session.

MORFOLOGIC + ENDOMASSAGE + CAVITATION: CUSTOMISED TREATMENT

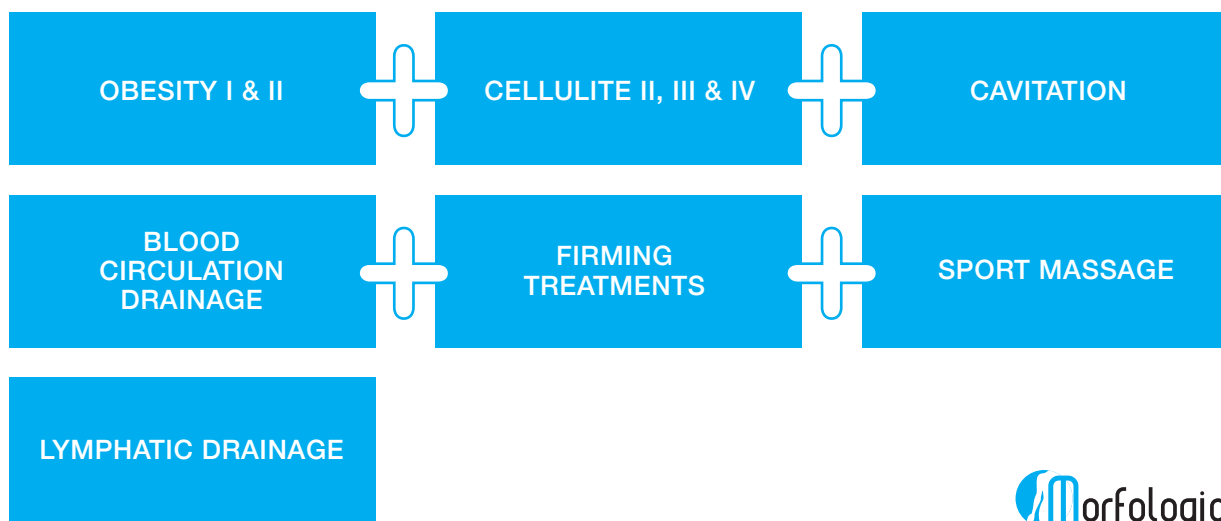

Endomassage® therapy acts intelligently adapting the power and suction rhythm to each phase of the treatment: **reduction, firming, blood drainage** and **lymphatic drainage**. Ultrasounds work with different frequencies that can be used combined or individually. High Frequency (1 MHz), and Low Frequency (600 KHz) are combined continuously or by pulsation, depending on their purpose and treatment.

Dermajet Morfologic® works at different levels of the tissue: epidermis, dermis, hypodermis, muscle and even visceral fat. Thus the simultaneous combination of the Endomassage® + Cavitation can get more localised effects.

TREATMENTS

50 Programs: 10 Universals + 40 Morphologic

Technical Characteristics

Power: 110–230 V / 50-60 Hz
Double Ultrasonic Frequency:
600 Khz – 1 MHz
Consumption: 500 W
Dimensions: 110.5 x 54 x 57.5 cm
Weight: 20 Kg

COSMETICS

CELUSPRAY

Anticellulite. It stimulates the elimination of localised cellulite nodules. With diffusion enzymes, biorrubin, caffeine and teofilin.
Cod. A9031C2

REDUSPRAY

Reducer. Indicated in cases of overweight and obesity. It stimulates the elimination of fat. With diffusion enzymes, Indian chestnut and ruscus.
Cod. A9031R2

FIRMSPRAY

Perfect for cellulitis with flaccidity or cellulite in tissues that have suffered sudden weight-loss. It stimulates microcirculation and repairs connective tissue damage.
Cod. A9031F2
