ULTRAJET BODY PRO

ULTRASONIC TECHNOLOGY

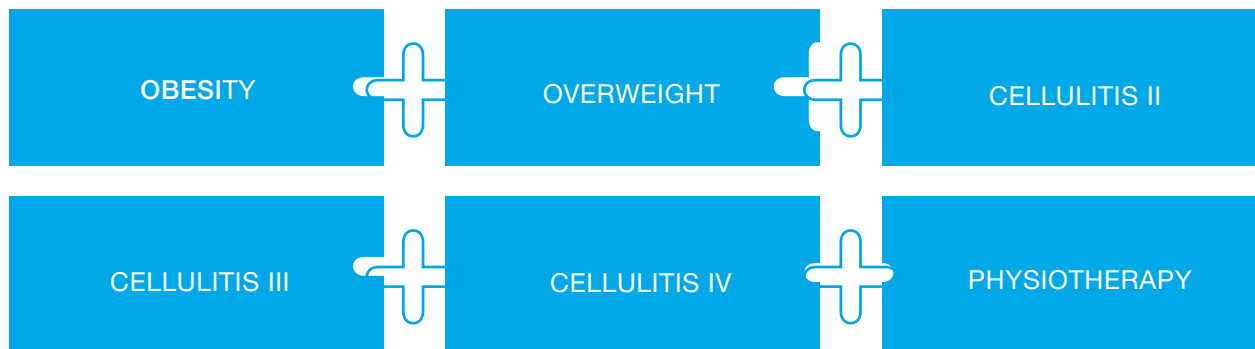

Ultrajet Body Pro® is the latest generation device based on ultrasonic technology. It has a double working system: AUTOMATIC and MANUAL.

In the **automatic system**, indicates the way of working depending on the selected treatment and the area to be treated dividing the treatment into 4 different phases.

In the **manual system**, allows us to work with 7 types of preset pressing with the additional option of a free push button, fully programmable by the professional.

Includes automatic calculation of BMI.

TREATMENT

Indications

- ✓ Localized fat
- ✓ Cellulitis
